Diablo Valley College
Workforce and Economic Development
Master Plan
2010-2015

Approved: Workforce Development Committee
Date: October 1, 2010
Acknowledgments

This Master Plan is a culmination of the hard work and diverse skills of many individuals who are bound together by their common vision of education as a means to build a thriving community. The conduit for their efforts was a master plan steering committee convened by the Workforce and Economic Development team to develop the Master Plan for 2010 to 2015. Members of the Steering Committee included:

- Sarah Boland, Coordinator, Career & Employment Services
- Vicki Brown, Specialist, Career Pathways
- Joe Costa, Instructor, Career and Employment Services
- Dona DeRusso, Coordinator, CalWORKs
- Mohamed Eisa, Dean, Planning, Research and Student Outcomes
- Susan Lamb, Vice President, Instruction
- Nicola Place, Senior Academic/Student Services Manager
- Kim Schenk, Dean, Career Technical Education and Economic Development
- Gay Teel, Instructor and Department Chair, Dental Hygiene

Assisting the Steering Committee in its work was Hatchuel Tabernik & Associates, a consulting firm that offers a complete range of planning, research, evaluation, grant writing, and training services. Team members included Carol Hildebrand, Jayne Williams, Chandreve Clay, and Maria Villagrana.

The 2010-15 Master Plan builds on the 2004-08 Workforce Development Master Plan, created by Diablo Valley College and MGT of America.
Diablo Valley College (DVC) is passionately committed to student learning through the intellectual, scientific, artistic, psychological, and ethical development of its diverse student body. DVC prepares students for transfer to four-year universities; provides career/technical education; supports the economic development of the region; offers pre-collegiate programs; and promotes personal growth and lifelong learning.

In 1999 the California Legislature defined a primary mission of the California Community College system as advancing “California's economic growth and global competitiveness through education, training, and services that contribute to continuous work force improvement.” Workforce and Economic Development activities within the college encompass a broad range of educational options: certificate programs, degree programs, short-term courses, and courses offered by contract with employers. In addition, Workforce and Economic Development activities include building relationships with the business community and public sector partners that play a role in workforce education and economic development, within Contra Costa County, in the greater Bay Area, and, in some cases, beyond. The community colleges are a key element of the workforce investment system as defined at the federal and state levels.

With this wide range of mandates, offerings, and partnerships to coordinate, the faculty and staff responsible for planning, coordinating, and delivering Workforce and Economic Development programs and services engaged in a strategic planning process. DVC faculty, staff, and students, along with industry and public sector stakeholders in workforce and economic development all provided input to the planning process. The following document outlines context and the planning process, as well as the findings, goals, and strategies synthesized from this input by a cross-disciplinary team at DVC.

This plan is intended to guide the further growth and development of DVC’s Workforce and Economic Development programs and services over the next five years.
Background and Purpose of Plan

Prior Plan
In 2003, DVC had no formal Workforce and Economic Development (WED) document to guide the faculty and administrators who were responsible for planning, coordinating and delivering services in these areas. Subsequently, these individuals initiated a planning process that resulted in a WED-specific vision and mission, as well as goals and objectives to cover the period 2004-2008. This prior Workforce Development Master Plan had a strong focus on the internal processes, structures, and resources needed to build a strong and coordinated workforce development effort on the campus. In 2009 the WED team was moving to completion on those goals and objectives and recognized the need for a new planning process.

The Growth of WED
Between the development of the 2004-2008 Master Plan and the spring of 2010, when a new planning team was convened, WED at DVC had undergone significant changes. The changes included the creation of a Dean of Career Technical Education and Economic Development, a position of Career Pathways Specialist and the establishment of a college wide Workforce Development Committee, as well as the identification of college programs and services that support workforce development aims, such as the DVC Career and Employment Services Center, Career Counseling, Co-operative Work Experience, student support services, and CalWORKs programs.

By 2008-09, enrollment in career technical courses¹ grew to 46.2% of DVC’s total student head count. The rate of growth in career technical courses between 2006-07 and 2008-09 was 14.8%, almost double the rate of DVC as a whole.

Purpose of Plan
Where the former plan had focused on building and coordinating workforce development at DVC, the 2010 WED Plan Development Steering Committee articulated the need for a broader focus that included both internal and external issues and partners, along with practical approaches to increase responsiveness to the region’s changing economy and labor market needs. This plan will guide Workforce and Economic Development faculty and staff in:

- Developing up-to-date, data-driven workforce education and training
- Improving organizational processes for communicating with the business community and marketing WED resources and services
- Creating targeted student support programs and services and integrating these into the menu of workforce development offerings
- Developing and sustaining funding and other resources to support and grow effective WED practices

¹ Defined as courses coded in the California Community Colleges Management Information System Data Element Dictionary under CB09, “Apprenticeship, Advanced Occupational, Clearly Occupational, or Possibly Occupational.”
Scope and Implementation
This Master Plan focuses on furthering the workforce and economic development elements of both DVC’s mission, and that of the mission of the Contra Costa Community College District (CCCCD). These elements are explicitly called out in the current strategic plans at the College and District levels.

In the DVC 2006-2011 Strategic Plan, Goal Area C calls for “Enhancing the Region’s Economic Development” through aligning degrees and certificates with industry needs, developing community and industry partnerships, creating new programs, and strengthening collaborations with four-year institutions. The 2009-2014 CCCCD plan has a goal area called “Partnership for Workforce and Economic Development,” which aligns with the DVC plan’s Goal Area C and its strategies and also calls for increased District participation in workforce and economic development activities. The CCCCD plan also includes increasing “the percentage of students who receive relevant and timely training for the workplace” as an objective under Student Learning and Success. Aligning budget resources with plan priorities is both a DVC and District objective. Finally, DVC objectives of developing long-term plans for the college, encouraging the exchange of information among constituents, and involving stakeholders in decision making also tie into the WED Master Plan.

One of the themes that arose out of the WED planning process was that the College as a whole is engaged in workforce development, whether through preparing students for an associate degree, a transfer to a four-year institution, or through career-related education that leads directly to the workforce. The desired long-term outcome for the vast majority of DVC students is success in their chosen field.

With this in mind, implementation of the WED Master Plan will touch nearly every level of the college.

- The Dean and staff of WED will take the lead in communicating about the plan’s components to all segments of the campus that will be involved in implementation and following up on action items.
- The Workforce Development Committee will review progress and take on specific action items related to the goals and strategies in the plan.
- Faculty from across the campus will work with WED staff, business partners, and each other to develop and/or adapt curricula that increase responsiveness to business and student needs.
- College leadership and administration will be involved in developing and implementing policies that support effective programs and partnerships.
- District leadership will be involved in regional dialogue on topics including labor market responsiveness, use of data, and resource development.

While the Steering Committee has included a master timeline for implementing the major strategies of the plan, the planning group anticipates that these strategies will be revisited and updated at least annually by a subgroup of the Workforce Development Committee.
Plan Development
In the spring of 2010, the Dean of Workforce and Economic Development contracted with Hatchuel Tabernik & Associates (HTA) to facilitate the planning process and compile the 2010 plan document.

Following a launch meeting, the Dean convened a Steering Committee representing the DVC Office of Planning, Research, and Student Outcomes; Instruction; Career and Employment Services; Student Services; Career Pathways; the DVC/K-12 Tech Prep Consortium, CalWORKs programs and other DVC faculty and staff.

The HTA planning team conducted an initial environmental scan that would help inform stakeholders in identifying and prioritizing internal and external needs. The HTA team reviewed and analyzed research materials and data provided by the Steering Committee and outside sources and summarized trends and key points for stakeholders. In addition, HTA worked with the Steering Committee to develop and distribute surveys of students, faculty/staff, employers, and community partners such as the Workforce Investment Board, Mt. Diablo Adult Education, and the Contra Costa County Office of Education. Seventy (70) DVC faculty and staff, 118 DVC students, 19 local employers, and 10 community partners submitted survey responses, which informed the development of goals and strategies.

A series of stakeholder meetings were convened: one for college leadership, one for faculty and staff, one for external stakeholders (businesses and public agencies), and a final meeting for faculty, staff, and any stakeholders who had attended previous meetings. The three stakeholder meetings attracted 31 participants from DVC and seven from other partner agencies. The meetings were hands-on, working sessions in which stakeholders actively discussed the context for the plan and shaped its vision, mission, and goals.

Themes
Common themes that arose out of research review and stakeholder discussions included the following:

- Student preparedness for college-level academic work is less than optimal for the majority of first-time students.
- The college needs to be more agile and forward-looking in responding to quickly-changing economic and labor market conditions.
- Employers value, but are not seeing, entrants to the workforce who have solid workplace readiness skills such as communication, teamwork, problem-solving, and professionalism.
- The upcoming retirement of skilled workers in many trades and professions, especially workers with strong science, technical, and mathematical skills, will leave a large gap in the labor market.
Components
The plan consists of the following components:
- Vision Statement: a projection of what the future would look like if Workforce and Economic Development activities were completely successful.
- Mission Statement: how DVC WED proposes to reach the envisioned future.
- Goals: what the plan is intended to work toward in the next five years.
- Guiding Principles: criteria for making decisions about strategies that support the goals.
- Implementation Grid: long-term outcomes, strategies that will lead to these outcomes, and anticipated intermediate outcomes for each strategy. The grid also identifies parties who will guide implementation, as well as a timeline for each strategy.

Approval, Monitoring and Integration

The Master Plan will be presented to the Workforce Development Committee (WDC) as draft at the September 9th, 2010 meeting. The WDC is responsible to review and approve the Master Plan. The final plan will then be presented to the Institutional Planning Committee and the College Council.

The WDC is responsible to review the progress toward objectives and evaluate and update the plan on an annual basis. In addition to integrating plan priorities with budget resources, the WDC will work to align the plan priorities with the DVC program review process. WDC and college partners will ensure plan efficiency by using existing college implementation and oversight bodies whenever possible to facilitate the work of the plan.
## Components of DVC Workforce and Economic Development Programs

1. Career Technical Education (CTE) programs
   - Certificates of Accomplishment
   - Certificates of Achievement
   - Associate in Art/Science degrees
   - Transfer programs
   - Apprenticeship.
2. Articulated career preparation programs
   - Tech Prep
   - Career Pathways
3. CTE non-credit courses
4. Contextualized basic skills courses/CTE learning communities
5. Related Career and Employment Services
   - Work Experience Education (COOP)
   - Job Placement
   - Employability Workshops
   - Career Exploration Activities
6. Economic Development
   - Contract Education
   - Customized Training
   - Fee-based Training
   - Strategic Partnerships
   - Grant Development/Management
The following principles were created to guide the development of strategies to support the campus vision for Workforce and Economic Development (WED) programs. They also inform implementation of the strategies and can serve as criteria against which decisions and actions may be evaluated.

1. Promote stakeholder commitment to ongoing review, update, and evaluation of the WED plan.
2. Provide a clear, specific direction for future action.
3. Establish specific roles and responsibilities for implementation.
4. Integrate diverse efforts and create a coordinated, campus-wide workforce development system.
5. Engender a college-wide awareness and acceptance of workforce development.
6. Encourage and support the inclusion of workforce preparation skills throughout college activities, programs, and services.
7. Use research and data to guide decision-making processes and integrate planning with program review and resource allocation.
8. Use industry standards to design program enhancements, modifications, and curriculum.
9. Base decisions related to new and continuing programs on measurable and attainable criteria.
10. Reflect consideration of the diverse needs of the student body and community.
11. Emphasize collaborative approaches which maximize fiscal and human resources.
12. Integrate student services into the core functions of workforce development.
Vision Statement
The Workforce and Economic Development Programs at DVC prepare the workforce for a changing global economy to enhance regional competitive advantages.

Mission Statement
The Workforce and Economic Development Programs at DVC create a highly skilled, competitive workforce by providing quality, flexible learning opportunities and support services that address the needs of diverse student populations and the regional economy.

Goals for 2010-2015
1. Ensure high-quality workforce education through industry-driven curriculum that advances student learning, skill development and employability.
2. Create and maintain sustainable organizational processes and partnerships that anticipate and respond to labor market needs and changes.
3. Expand and enhance the integration of student support programs and services that prepare students to succeed in the workforce.
4. Collaborate with internal and external stakeholders to increase awareness and support of workforce and economic development.
