MODULAR BID PACKAGE

LPAS
### General Notes

1. Full responsibility for the design, coordination, and fabrication of all aspects of the building systems (civil, structural, mechanical, electrical, plumbing, etc.) rests with the architect and engineer. Responsibility for design and coordination is absolute, and no responsibility shall be assumed for omissions or errors in the contract documents as provided by the architect and engineer.

2. The architect and engineer are responsible for ensuring that all work is in compliance with the building codes and standards, and that all work is coordinated with other systems and trades.

3. The contractor is responsible for the installation of all systems and components, and for ensuring that all work is coordinated with other trades and systems.

4. The contractor shall provide all necessary labor, materials, equipment, and other items required for the performance of the work, and shall comply with all applicable laws, codes, and standards.

5. The contractor shall ensure that all work is performed in a manner that is safe and in compliance with all applicable laws, codes, and standards.

### Applicable Codes

- **2013 California Building Code (CBC)**
- **2013 California Electrical Code (CEC)**
- **2013 California Mechanical Code (CMC)**
- **2013 California Plumbing Code (CPC)**
- **2013 California Fire Code (CFR)**

### Scope of Work

1. Identification of building systems, construction materials, and the overall scope of work.
2. Coordination with other trades and systems to ensure smooth integration.
3. Preparation of detailed construction drawings and specifications.
4. Supervision of the construction process to ensure quality and compliance.

- **Michael Baker:** (925) 229-1000
1. RESTROOM IDENTIFICATION SYMBOL:

- A. Restroom signs shall conform to the following:
  - Geometry: The triangle shall be an equilateral triangle with its base along the horizontal plane of the door. The triangle shall be filled with a geometric symbol, such as a square or circle, and shall contrast with the background.
  - Dimensions: Minimum dimensions of the triangle shall be 1/4 inch (6.4 mm) wide and 1/4 inch (6.4 mm) high. The distance between the center of the triangle and the center of the circle shall be at least 1/4 inch (6.4 mm).

2. ELECTRICAL MOUNTING SURFACES:

- A. Objects projecting from walls with leading edges between 27 inches and 80 inches above the finished floor may project a maximum of 12 inches (305 mm) into the room, provided the projection does not reduce maneuvering space.

3. ELECTRICAL OUTLETS:

- A. Electrical outlets shall conform to the following:
  - Geometry: The outlet shall be a black or dark-colored square with rounded corners, measuring at least 1 1/2 inches (38 mm) on each side.
  - Mounting: Outlets shall be mounted a minimum of 1 1/2 inches (38 mm) above the finished floor to the centerline of the sign.

4. GRAB BARS:

- A. Grab bars shall be mounted adjacent to a wall and their clearance between the wall and the grab bar shall be at least 2 inches (51 mm).

5. TOILET PAPER DISPENSER:

- A. Toilet paper dispensers shall be mounted a minimum of 1 1/4 inches (32 mm) above the finished floor to the centerline of the sign.

6. SANITARY FACILITIES:

- A. Sanitary facilities shall be provided a minimum of 10 inches (254 mm) wide with door open 90 degrees, measured from the face of the door to the latch. The latch shall be flip-over style, sliding, or other hardware not requiring the user to reach up, over, or around the latch.

7. MANEUVERING CLEARANCES:

- A. Minimum maneuvering clearances at doors shall be as shown in the door plan. The clear width required is 32 inches minimum with door open 90 degrees, measured from the face of the door to the latch. The latch shall be flip-over style, sliding, or other hardware not requiring the user to reach up, over, or around the latch.

8. SMOOTH SURFACE:

- A. The bottom 10 inches of all doors except automatic and sliding shall have a smooth finish.
GENERAL NOTES:

1. SEE SHEET A0.10M FOR CODE COMPLIANCE INFORMATION.
2. SEE SHEET A0.40M FOR ACCESS COMPLIANCE INFORMATION.
3. SOME SITE ELEMENTS ARE SHOWN FOR REFERENCE PURPOSES ONLY.
4. UNLESS OTHERWISE NOTED, SITEWORK IS OUTSIDE THE SCOPE OF THIS DOCUMENT.
5. SEE CIVIL DRAWINGS FOR ADDITIONAL INFORMATION ON PAVING.
6. MODULAR BUILDING MANUFACTURER IS RESPONSIBLE FOR SITE EXCAVATION REQUIRED TO SET MODULAR BUILDING COMPONENTS. COORDINATE REQUIREMENTS WITH SITE BUILT CONSTRUCTION REQUIREMENTS.
7. COORDINATE FINISH FLOOR ELEVATION AND CRAWL SPACE DEPTH WITH DESIGN TEAM.
8. MODULAR BUILDING MANUFACTURER SHALL PROVIDE PERIMETER FOUNDATION VENTS, AS REQUIRED. PROVIDE NON-REMOVABLE STEEL GRATE COVERS. MODULAR BUILDING MANUFACTURER SHALL PROVIDE CRAWL SPACE ACCESS AND WELL. PROVIDE LOCKABLE COVER. COORDINATE LOCATION WITH SITE BUILT CONSTRUCTION.
9. FENCES, GATES, ETC. ARE OUTSIDE THE SCOPE OF THE MODULAR BUILDING CONTRACT AND ARE SHOWN FOR REFERENCE PURPOSES ONLY.
10. STUB ALL UTILITIES, INCLUDING BUT NOT LIMITED TO DOMESTIC WATER, SANITARY SEWER, STORMWATER, ELECTRICAL, ETC. 5'-0" MINIMUM FROM BUILDING FACE. COORDINATE POINTS OF CONNECTION WITH SITE BUILT CONTRACTOR. PROVIDE POINTS OF CONNECTION IN CONCRETE CHRISTY BOX OF ADEQUATE SIZE TO ACCOMMODATE CONNECTIONS, SHUTOFFS, ETC. SEE MECHANICAL, ELECTRICAL, PLUMBING DRAWINGS FOR ADDITIONAL INFORMATION.

SCOPE OF WORK IN THIS SET OF DOCUMENTS IS FOR MODULAR BUILDING Project will ultimately go through Division of the State Site Built Construction 3 Construction consists of two components: Site Built Components will require penetration through modular basis of design shown in building sections is concrete filled metal deck Modular building manufacturer is responsible for the design and Site Built Components is designed to be structurally independent with architect and architect’s consultants for interface of all components. Only. Roof building system, including but not limited to civil, structural, mechanical, electrical, fire alarm, weatherproofing, etc. Building roof and floor system. Modular building manufacturer shall account for coordination required. T.O. modular parapet framing system over crawl space. Slab-on-grade construction is also acceptable. Manufacturer shall submit proposed floor system to architect and district for approval prior to submitting bid. Provide rate slab at crawl space with area drains stubbed to 5' from building for site contractor’s connection to storm drainage system. Installation of concrete footing and foundation system supporting modular building components. Modular building manufacturer these elements with design and installation of footing and foundation systems for site built elements. Movement joints between the two structures are not part of the modular contract. While modular manufacturer is not responsible for installation components with design team to develop intersection details. Coordinate interface of all components is part of the scope. Modular buildings are preferred to facilitate coordination. Finish floor review.

Modular construction - NIC 1/4" = 1'-0"
NOTE: ELECTRICAL BOXES ON OPPOSITE SIDES OF WALL SHOULD BE OFFSET FROM EACH OTHER A MINIMUM OF 24".

NOTE: WHERE FACE LAYER OF (2) LAYERS 5/8" GYPSUM BOARD OF THIS WALL DOES NOT ALIGN WITH THE GYPSUMBOARD FINISH OF AN ADJACENT WALL TYPE, ADDITIONAL LAYER(S) OF GYPSUM BOARD SHALL BE ADDED ... LAYER(S) SHALL CONTINUE UNTIL THE SURFACE IS INTERRUPTED BY AN INTERSECTING WALL, COLUMN, OR OTHER NATURAL TRANSITION POINT.

### General Notes

A. The Contractor shall ensure the project site is free of debris and for the safety of persons and property, steps shall be taken and the area shall be kept clean and safe at the end of each day's work. Any and all services of the project shall be covered by insurance to include but not limited to fire, theft and other losses and the Contractor shall provide to the Architect a certificate of insurance evidencing such coverage.

B. The Contractor shall supply and install all Necessary equipment and Materials. All equipment and Materials shall be new, factory finished and in accordance with the specifications and plans and shall be consistent with the Quality and finish specified. The Contractor shall be responsible for the quality, quantity, and proper installation of all Equipment and Materials provided by the Contractor. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

C. The Contractor shall perform all Necessary work in accordance with the plans and specifications and use such labor, materials, and equipment as are Necessary to complete the work satisfactory to the Architect and the Owner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

D. The Contractor shall be responsible for the performance of the work in accordance with the plans and specifications, and the Contractor is responsible for any defects in workmanship and materials which arise during or after the completion of the work.

E. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

F. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

G. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

H. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

I. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

J. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

K. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

L. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

M. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

N. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

O. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

P. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

Q. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

R. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

S. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

T. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

U. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

V. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

W. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

X. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

Y. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.

Z. The Contractor shall be responsible for the preservation, protection, and handling of all equipment and materials provided by the Contractor. The Contractor shall be responsible for the safety of persons and property and shall take all necessary steps to ensure that the work is completed in a safe and satisfactory manner. The Contractor shall be responsible for the proper preservation, protection, and handling of all equipment and materials provided by the Contractor.
